1. The lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

2. Claims 1-46 are objected to because of the following informalities: the individual claim numbers of all current claims are listed as "[c1]" ... "[c46]". Current USPTO practice reserves the "[" and "]" brackets as indicators for that which is to be removed from the claims. All the current claim numbers shown should be rewritten as
- - Claim 1 - - ... - - Claim 46 - -. Appropriate correction is required.

3. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

4. Claims 1-7, 11-24,26-29,32-35,37-40,42,44-46 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-7,12-25,27-30,33-35,38-41,43,45-47 of copending Application No. 10/708,833 in view of Vatanen US 2002/0083320A1. This is a

provisional obviousness-type double patenting rejection since the conflicting claims have not yet been patented.

The subject matter claimed in the instant application is fully disclosed in the referenced copending application and would be covered by any patent granted on that copending application since the referenced copending application and the instant application are claiming common subject matter, as follows; claims of the current application and copending application contain identical elements except that the current application recites a "DNA" detector and the copending application recites a "smellprint" detector. Vatanen discloses throughout, a identification circuit card which includes a comparison between collected DNA data and previously stored DNA data for authentication. It would have been obvious to a person of ordinary skill in the art at the time of the invention to use DNA identification as taught by Vatanen in the system of the copending '830 claims. This would provide a very specific biometric identification to a single user for optimal security.

5. Claims 8-10,25,30-31,36,41,43 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

6. The following is an examiner's statement of reasons for allowance: the prior art of record fails to teach or fairly suggest to one of ordinary skill in the art at the time of the invention the specific DNA detection features as recited in the objected to claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Walker 2003/0093187A1, Ross 2001/0013546A1, Buescher et al. 6,588,660, Geefield WO 9606409A1 all disclose card/tags with biometric considerations.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Karl D. Frech whose telephone number is (571) 272-2390. The examiner can normally be reached on maxi-flex.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Michael G. Lee can be reached on (571) 272-2398. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
